13.306 LABORATORY ANIMAL SCIENCES AND PRIMATE RESEARCH

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Public Health Service Act, Section 301; Public Law 78-410, as amended; 42 U.S.C. 241; Public Health Service Act, Section 472; Public Law 78-410, as amended; 42 U.S.C. 289l-1.

OBJECTIVES: The objective of the Laboratory Animal Sciences and Primate Research program is to support resource projects that enable biomedical scientists to use animals effectively in research on human health problems. Special attention is given to animal resource projects that are broadly supportive of the missions of the various NIH components. Objectives are accomplished through a Primate Research Centers program, and a Laboratory Animal Sciences program. The Primate Research Centers program provides for and conducts biomedical research using a large number and variety of nonhuman primate subjects. Its primary purpose is to develop primate models of human disease conditions and to offer training and expertise in primatology as it relates to medical research. The Laboratory Animal Sciences program was established to help research institutions meet their need for higher quality, speciialized research animals, for improved care of animals and for better characterization of animals as biomedical research models. Grants support such activities as developing and maintaining colonies of special research animals; developing and defining new animal biological models; developing and improving institutional animal resources, including projects to meet the requirements of the Animal Welfare Act of 1970 (PL 91-579) and NIH policies on the care and use of laboratory animals; developing and maintaining laboratoratory animal disease diagnostic laboratories, including those assuming a regional responsibility; investigating ways to improve the health and well-being of research animals; and developing projects for gathering and disseminating information on research animals, laboratory animal medicine and technology.

Range and Average of Financial Assistance: Grants: $4,000 to $3,281,130; $126,723.

PROGRAM ACCOMPLISHMENTS: The primary emphasis in biological carcinogenesis has largely moved away from the search for human cancer viruses and has beeen directed toward studies of genes, gene products, and cellular control mechanisms which are involved in malignancy. The tumor viruses of lower animals are now used as important tools for deciphering the molecular pathways by which a cell becomes malignant. Molecular biologists have successfully isolated the specific genes, and their protein products from many of these viruses which are responsible for causing cancer. They have also found that these genes are present in all normal vertebrate cells, including those of humans. This suggests that, under ordinary conditions such genes may serve a normal function which, aberrantly or inappropriately expressed, may cause cancer. Consequently, research on the way in which the cell controls the expression of genes and on the way in which proteins coded for by these genes act on the cell, is very important in finding a way to block the transformation process and prevent cancer. In the area of chemical and physical carcinogenesis, important information has been obtained on the various pathways by which environmental chemicals are metabolized by cells either to harmless or to more carcinogenic forms. The enzyme systems responsible have been isolated and characterized from many animal sources, and work is now underway on similar systems operating in human cells. This work may lead to an understanding of the variability in the human response to carcinogen exposure and may help identify individuals who are at an increased cancer risk from such chemicals. In addition, a program is underway to determine the differences and similarities between various species of animals in the way they metabolize carcinogens as compared to humans. This research effort will help in extrapolating data on experimental animal carcinogenesis to humans. Chemoprevention research with retinoids, which are natural and synthetic analogs of Vitamin A, has shown to inhibit or delay the development of invasive malignancy in animal models of epithelial carcinogenesis in skin, lung, breast and bladder. Inhibition has been shown for both chemically-induced and radiation-induced cancers, as well as inhibition of the so-called spontaneously arising tumors. Continued efforts are being made to develop compounds of this type which are capable of arresting, reversing or otherwise inhibiting the carcinogenic process in the desired target organ and tissue, while providing sufficiently non-toxic effects upon the host. In the area of epidemiology, occupational studies have long played an important role in identifying environmental carcinogens. There are implications beyond the work force, since many agents spread from the work place to the surrounding environment. Although the extent of the hazards resulting from environmental pollution or contaminated consumer products is not clear, there is no question that occupational groups are invaluable as sentinels for identifying and evaluating risks to the general population. Laboratory investigations searching for dietary and nutritional factors related to carcinogenesis include studies of chemical and molecular mechanisms of cancer induction by a variety of dietary constituents (e.g., mycotoxins, nitroso compounds, fiber, proteins) as well as studies on the mechanism of action of certain dietary constituents which may have a preventative or inhibitory effect on the carcinogenic process. In fiscal year 1981, 3002 cancer research competing applications were received and 919 awards (30 percent) for "Cancer Cause and Prevention Research" were made among the 3,056 research grant awards.

PROGRAM ACCOMPLISHMENTS: A cooperative study for the early diagnosis of lung cancer continues to accumulate subject follow-up data. The study has demonstrated that regular exams of sputum cytology along with x-rays can detect up to 25 percent more lung cancer than x-ray examination alone, and these cancers discovered by cytology are more likely to be resectable and potentially curable lesions. A large population screening study for bowel cancer utilizing the Hemoccult test continues to accumulate subjects, but no preliminary results are yet available. Research has continued on a large number of tumor associated marker substances including hormones, isoenzymes, tumor glycoproteins, and nucleic acid degradation products. New ways to look at and analyze multiple simultaneous marker values continued to be explored. The use of radio labeled antibodies to several tumor associated antigens has proven feasible for the accurate localization of suspected tumor metastases by nuclear medicine scanning techniques. Research continued on the development of large screen x-ray image receptors which will transform the radiograph into a digitally stored high quality image. Research has also continued the development of tumor markers and immunodiagnostic assays and has yielded improved Carcinoembryonic Antigens (CEA) assays. Other accomplishments include advances in tumor imaging with monoclonal antibodies, automated cancer cell diagnosis techniques and breast cancer quantitative diagnostic imaging using ultrasound. Range and Average of Financial Assistance: $4,000 to $2,981,515; $165,622.

PROGRAM ACCOMPLISHMENTS: Clinical treatment research is aimed at using chemotherapy, radiotherapy, and immunotherapy and surgery alone or in combination in order to attain optimal treatment of the cancer patient. Major emphasis will continue to be placed on the clinical evaluation of newly identified therapeutic agents and comparison of these agents and their effects relative to older established drugs. Also, emphasis will be placed on the incorporation of active agents in combinations and in conjunction with other therapeutic approaches. These efforts have been undertaken through the use of grants, cooperative agreements and contracts. Cooperative agreements will be primarily used for detailed studies by the Clinical Cooperative Groups. One phase of studies concentrates on detailed comparisons of new versus established therapies with single drugs, combinations of drugs and combined modalities. Another phase of studies concentrates on adjuvant trials in advanced cancer patients in which intensive chemotherapy is used shortly after primary local treatment, usually surgery, in an attempt to eradicate residual tumor. Additional emphasis will continue to be placed on attempts to identify treatments causing less morbidity for the patient and reduced functional loss and disfigurement through less extensive surgery. Clinical trials will be continued with selected biological response modifiers, utilizing clinical resources established specifically for that purpose. Evaluation of known agents, such as interferon and thyumosin, MVE2, and monoclonal antibodies will be continued and expanded. In the area of fast neutron therapy, two clinically based facilities are close to initiating studies, while two others continue to construct the necessary facilities and procure neutron generators for activation scheduled for the future. Controlled prospective clinical studies are in progress with radiosensitizers and radioprotectors in selected generally unresponsive cancers such as those involving the esophagus and gliomas of the brain, plus studies in locally advanced cervical cancer to evaluate local heat as an adjunct to radiotherapy. Clinical treatment research efforts will continue on fundamental problems of surgical oncology, the use of x-ray and other radiotherapy techniques, intraoperative radiotheraphy, and the interaction of these and other treatment modalities. Under preclinical treatment, research continues to focus on fundamental preclinical problems in areas of biochemistry, pharmacology, molecular biology, chemistry and radiobiology. In particular, research will continue to be conducted on biological response modifiers in order to understand their mechanisms of action. Radiation research continued in the areas of neutrons, radiosensitizers and radioprotective agents, concentrating in particular on fundamental studies on how these agents interact with cells and with other treatments. With regard to nutrition, clinical studies which are evaluating the role of intravenous hyperalimentation, in support of patients undergoing therapy, will become evaluable. Studies evaluating caloric intake and expenditure will be initiated in cancer patients. In fiscal year 1981, 3002 cancer research competing applications were received and 1034 awards (34 percent) were made for

"Cancer Treatment Research" among the 3,056 research grant awards.

Range and Average of Financial Assistance: Grants: $4,000 to $1,588,791; $113,789.

PROGRAM ACCOMPLISHMENTS: Cancer Biology Research through the tumor biology and immunology research programs has resulted in significant progress in studies of the cell membranes of cancer cells and normal cells in an effort to understand how changes in the membrane are related to abnormal cell growth. Small molecules that regulate cell growth have been isolated and purified and their binding to specific receptors on the cell surface has been studied. Using the new techniques of recombinant DNA and nucleic acid sequencing, the genes involved in malignant change are being characterized and we are beginning to learn how they are regulated. Of continued interest will be studies on the susceptibility of the mammary gland to neoplastic transformations during periods of pregnancy and aging. In the area of cell genetics studies have been expanded on the regulation of genes controlling cell growth and genes involved in cancer. Progress has also been made in understanding the complexities of the immune system and how it recognizes the abnormalities on the surface of tumor cells. These studies have involved both the study of antibodies that circulate in the blood and "natural killer cells" that are able to recognize and destroy cancer cells. Studies have been expanded on the functional capacity of "natural killer cells" and their role in the immune reactions to lymphoid cancers. Continued efforts have been directed toward learning how cancer cells avoid destruction by the immune system and how this may be related to the growth and spread of tumors. In fiscal year 1981, 302 cancer research competing applications were received, and 949 awards

(31 percent) for "Cancer Biology Research" were made among the 3,056 research grant awards.

PROGRAM ACCOMPLISHMENTS: In fiscal year 1980, the program supported 121 grants dealing with a variety of cancer control projects. A major thrust of the Cancer Control Prevention Program is cancer risk reduction resulting from chemical and radiation exposures. Recent activities have focused upon reducing exposures to carcinogenic agents, and newer activities are related to inhibiting carcinogenesis with natural chemopreventive agents. In the area of chemical protection, a project for gathering information on carcinogens of public health importance was recently completed. Projects related to identifying individuals at risk from exposure to DES will be completed during FY 1982. In the area of reducing exposures to radiation, the six Centers for Radiological Physics (CRP) continue to review physics practices at cancer control facilities, serve as a resource for technology transfer and act. A five-year program to follow a group of approximately 65,000 women who were screened during a nationwide breast cancer detection demonstration project has been implemented at 28 locations throughout the country. Research efforts are being supported in the area of cancer risk assessment relative to screening and early detection. In the evaluation, rehabilitation and continuing care, the Cancer Control Outreach Programs have promoted wider use of the most up-to-date patient management techniques by community hospitals and physicians, and of making it possible for community hospitals and physicans to enter patients onto national research programs. The program has been successful in that large numbers of patients from the community have been entered onto research protocols. The Centralized Cancer Patient Data System, (CCPDS) a component of NCI's comprehensive cancer centers, has continued to collect identical information on all centers' patients, thus facilitating evaluations of the efficacy of cancer control programs. In the area of education, protocols are being developed for cancer education in breast self-examination, smoking cessation and occupational health. These protocols will be disseminated nationally in 1982. Also, courses on cancer prevention for medical students, residents, nurse practitioners, and physicians assistants were developed, field tested and evaluated. The courses have been developed and packaged for replication at other institutions. In fiscal year 1981, 110 competing applications for "Cancer Control Research" were received, and 22 (20 percent) were funded. A total of 120 competing and non-competing awards were made.

USES AND USE RESTRICTIONS: This integrated DOL/HHS program is directed to employable welfare recipients and applicants under the program of Aid to Families with Dependent Children (AFDC) who are required to register for work, training and employment related services, or who volunteer. Employment and training services offered include: assistance in finding and entering employment using such methods as group job seeking, on-the-job training, institutional training, work experience, and the use of non-WIN funded services when available. WIN also provides funding for expenses related to participation, such as transportation as well as lunches, and incentive payments. WIN employment and training services are supplemented by WIN funded social services provided and/or arranged by a Separate Administrative Unit (SAU) of the State welfare agency such as (1) child care; (2) employment related remedial care and health related services; (3) counseling; (4) family planning; and (5) selected vocational and rehabilitation services. Employers hiring WIN registrants are eligible for a tax credit. JOINT FUNDING: This program is considered suitable for joint funding with closely related Federal financial assistance programs in accordance with the provisions of OMB Circular No. A-111. For programs that are not identified as suitable for joint funding, the applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State Employment Service agencies usually administer the WIN program. Social services are provided through a Separate Administrative Unit of the welfare agency. WIN services are available in all States as well as in Puerto Rico, the Virgin Islands, and Guam. In 1982, under P.L. 97-35, States have the option to run a WIN demonstration program, under the auspices of the State welfare agency, rather than the dual agency administration. The Office of Family Assistance, Health and Human Services, administers the WIN demonstration program under Section 445 of the Social Security Act, Part II, C.

Beneficiary Eligibility: Applicants and recipients of Aid to Families with Dependent Children (AFDC) who are required by law to register with WIN or who choose to register voluntarily.

Credentials/Documentation: Governors or their designated plan review agencies must be given an opportunity to review the State Plan pursuant to Part III, Attachment A of OMB Circular No. A-95 (Revised). The annual State plan deadline is August. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: WIN State Budget and Goals are established by the National Coordination Committee. The standard application forms as furnished by the Federal agency and required by OMB Circular No. A-102 must be used for this program. The WIN demonstration States follow office of family asssistance/HHS guidance.

Application Procedure: State Employment Service sponsors and SAU's submit grant and budget package following guidelines set by the National Coordination Committee (NCC) in Regulations and Handbook to the appropriate Regional Office. The WIN demonstration States follow office of family assistance/HHS guidance.

Award Procedure: Awards for program sponsors are generally given to State Employment Services, but the Regional Coordination Committee (RCC) has the final responsibility to designate the program sponsor. The Regional Director, OFO, makes final decisions on all award applications for State welfare agencies and the awards are made quarterly. Notification of awards must be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082. The WIN demonstration states follow Office of Family Assistance/HHS guidance.

Deadlines: Application for WIN employment and training agencies should be received prior to the beginning of each fiscal year. Applications for welfare agencies should be received 30 days prior to initiation of the program. The WIN demonstration States follow Office of Family Assistance/HHS guidance.

Range of Approval/Disapproval Time: None.

Appeals: Not applicable for WIN employment and training agencies. No formal procedures for welfare agencies.

Renewals: Not applicable for WIN employment and training agencies. Renewed and revised annually for Welfare Agencies.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: For employment and training agencies, and welfare agencies, a maximum of 90 percent can be Federal funds with 10 percent nonfederal cash or inkind matching. The statistical factors used for fund allocation are: 1) mandatory allocation based on the number of WIN registrants by State and the source is from agency administrative records provided by each State, and 2) discretionary allocation based on performance in eleven categories. Statistical factors for eligibility do not apply to this program.

Length and Time Phasing of Assistance: Each State receives a total WIN program planning level for the fiscal year. The State WIN sponsor and State welfare agency develop the annual State WIN Plan allocating resources to their respective program activities. WIN sponsors are funded on a fiscal year basis. Program financing is normally accomplished through Letter of Credit drawdowns needed to meet immediate cash requirements. For welfare agencies, funds are awarded quarterly based on quarterly estimates from State welfare agencies and annual limits of entitlement for expenditures as determined in the approved annual State WIN Plan. Monthly Letters of Credit are issued for cash draws from the most conveniently located Federal Reserve Bank.

Periodic audits should be made as part of the recipient's system of financial management and internal control to meet terms and conditions of grants and other agreements.

Records: State and local WIN employment and training agencies and welfare agencies are required to keep records of finances, program activities and registrant characteristics for 3 years, or longer if audit findings have not been resolved. In fiscal year 1981, 1704 individual complaints of discrimination were filed with OCR. 13.802 SOCIAL SECURITY—DISABILITY INSURANCE

FEDERAL AGENCY: SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Social Security Act of 1935, as amended; Public Laws 74-271, 92-603, 93-66, 93-233, 94-473, 95-216, 96-265, 96-473, 96-499, 97-35, and 97-123; 42 U.S.C. 420-425.

OBJECTIVES: To replace part of the earnings lost because of a physical or mental impairment severe enough to prevent a person from working.

TYPES OF ASSISTANCE: Direct Payments with Unrestricted Use.

USES AND USE RESTRICTIONS: Monthly cash benefits are paid to eligible disabled persons and to eligible auxiliary beneficiaries throughout the period of disability after a 5-month waiting period. Costs of vocational rehabilitation also are paid for certain beneficiaries. Disability benefits are not payable to a person confined in a penal institution because of a felony conviction unless that person is satisfactorily participating in a rehabilitation program approved for him or her by a court of law and which is expected to result in that person being able to engage in gainful activity upon release. There are no restrictions on the use of benefits received by beneficiaries.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: A disabled worker under age 65 is eligible for Social Security disability benefits if he has worked for a sufficient period of time under social security to be insured. The insured status requirements depend upon the age of the applicant and the date he became disabled. Certain family members of disabled workers also are eligible for benefits: (1) Unmarried children under age 18; (2) children age 18 through 21 if unmarried and full-time students in a post-secondary school prior to May 1982; effective August 1982, student benefits will be payable only up to age 19 for students in elementary secondary school. (3) unmarried adult offspring at any age if disabled before age 22; (4) wife or husband at any age if child in her or his care is receiving benefits on worker's Social Security record and is under 16 (for a newly entitled spouse); (5) spouse age 62 or over. The benfit for a spouse is subject to a pension offset if he or she receives a governmental pension based on his or her own work in non-covered employment. However the offset does not apply if the person receives or becomes eligible to receive the pension before December 1, 1982, and can meet eligibility requirements for Social Security dependents' benefit as they existed in January 1977.

Beneficiary Eligibility: Same as Applicant Eligibility. Under the definition of disability in the Social Security law, disability benefits (except those paid to widows, widowers and surving divoced wives) are provided a medically determinable physical or mental impairment that has lasted or is expected to last at least 12 months, or to result in death. Impairments arising in connection with a crime committed by the individual when a person is unable to engage in substantial gainful activity by reason of or in connection with the individual's confinement in a penal institution due to a felony conviction will not be considered in determining disability. Retired workers who have some work credits under Social Security and some work credits under a foreign social insurance system, but not enough credit to qualify under either system may have their credits combined if it would give them sufficient credit to qualify under Social Security. However the United States must have a special agreement with the foreign social insurance system. It currently has such agreements with Italy, Switzerland and West Germany and others are in the process of being finalized.

Credentials/Documentation: Proof of disability and possibly proof of age. If applying for benefits for family members, additional proofs of age, relationship to disabled worker, or school attendance may be required.

Range and Average of Financial Assistance: For a disabled worker who has met the disability insured status requirements as of January 1982, monthly cash benefits range from a minimum of $135.70 for a disabled worker to a maximum of $1,074.20 for a family receiving benefits. This takes account stipulations set forth in P.L. 96-265, and P.L. 97-35. Under P.L. 97-123, the minimum amount is no longer applicable for workers who either become disabled or first met the insured status requirements after December 1981, and a lesser amount can be paid, depending an the worker's average earnings.

PROGRAM ACCOMPLISHMENTS: It is estimated that in fiscal year 1982, an average of 4,415,000 disabled workers and their dependents will receive monthly cash benefits, and that during 1983 the number receiving benefits will decrease to 4,247,000.

13.803 SOCIAL SECURITY—RETIREMENT INSURANCE

FEDERAL AGENCY: SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Social Security Act of 1935, as amended; Public Laws 74-271, 92-603, 93-66, 93-233, 95-216, 96-473, 96-499, 97-35, and 97-123; U.S.C. 401-433.

OBJECTIVES: To replace part of the earnings lost because of retirement.

TYPES OF ASSISTANCE: Direct Payments with Unrestricted Use.

USES AND USE RESTRICTIONS: Monthly cash benefits are paid to eligible retired workers and their eligible dependents. There are no restrictions on use of benefits by a beneficiary.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Retired workers age 62 and over who have worked the required number of years under Social Security are eligible for monthly benefits. If an eligible worker age 62 or over applies before age 65, the individual will receive permanently reduced benefits. Also certain dependents can receive benefits. They include a wife or husband age 62 or over; a spouse of any age with a dependent child under age 16 for a newly entitled spouse (or over 18 and disabled before age 22) in his or in her care if the child is entitled to benefits based on the worker's record; unmarried children under 18 (22 if full-time students) in a post-secondary school prior to May 1982; effective August 1982, student benefits will be payable only up to age 19 for students in elementary or secondary schools; unmarried disabled children if disabled before age 22; and divorced wives or husbands age 62 or over who were married to the worker for at least 10 years. All benefits, other than benefits to disabled beneficiaries, and beneficiaries 72 and olkder, are subject to an earnings test under which benefits are reduced by $1 for each $2 of earnings over certain limits (in 1982, $4,440 for people under 65 and $6,000 for people ages 65 through 71). The benefit for a spouse is subject to a pension offset if he or she receives a governmental pension based on his or her own work in noncovered employment. However, the offset does not apply if the person receives or becomes eligible to receive the pension before December 1, 1982, and can meet eligibility requirements for social security dependents' benefits as they existed in January 1977. In a recent courtcase, Rosofsky V. Schweiker, a United States District Court found the present exception to the pension offset to be unconsititutional. The decision will be appealed. A worker and spouse can get benefits only for the months in which all conditions of eligibility were met, effective for people who have reached age 62 since August 1981. Retired workers who have some work credits under Social Security and some work credits under a foreign social insurance system, but not enough credits to qualify under either system, may have their credits combined if it would give them sufficient credits to qualify under social security. However, the United States must have a special agreement with the foreign social insurance system and it currently has such agreements with Italy, Switzerland, and West Germany. Also, free work credits are granted to persons of Japanese ancestry who were interned in the United States during World War II.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Proof of age. If applying for benefits for dependents, additional proofs of age, or relationship to the retired worker may be required.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: None.

Application Procedure: Telephone or visit the local Social Security Office.

Award Procedure: After review of the application is completed, the applicant will be notified by mail.

Range of Approval/Disapproval Time: Not applicable.

Appeals: Telephone or visit the local social security office. The appeal process ranges from a reconsideration to a review by the Federal courts.

13.805 SOCIAL SECURITY—SURVIVORS INSURANCE

FEDERAL AGENCY: SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Social Security Act of 1935, as amended; Public Laws 74-271, 92-603, 93-66, 93-233, 95-216, 96-499, 97-35 and 97-123; The Social Security Amendments of 1977; 42 U.S.C. 401-429.

OBJECTIVES: To replace part of earnings lost to dependents because of worker's death.

TYPES OF ASSISTANCE: Direct Payments with Unrestricted Use.

USES AND USE RESTRICTIONS: Monthly cash benefits are paid to eligible dependents of deceased workers. There are no restrictions on the use of benefits.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Benefits are payable only if the deceased was insured for survivors' insurance protection. Survivors eligible for monthly cash benefits are the following: widow or widower 60 or over, surviving divorced wife or husband age 60 or over who was married to the deceased worker for at least 10 years, widow or widower age 50-59 and disabled; young (under age 60) widow, widower, or surviving divorced spouse who has in his or her care a child under age 18 (16 effective September 1981 for a newly entitled spouse) or over age 18 and disabled and entitled to benefits on the deceased worker's social security record; unmarried children under age 18 (22 if full-time students in a post-secondary school prior to May 1982; effective August 1982, student benefits will be payable only until 19 for students in elementary on secondary schools) and over 18 and disabled before 22; and dependent parents age 62 and over. All survivors benefits are subject to an earnings test under which benefits are reduced by $1 for each $2 of earnings over certain limits. In 1982 limits are $4,440 for people under 65 and $6,000 for people 65 and over. Except for benefits to children and dependent parents, all survivors benefits are subject to a pension offset if the person is also receiving a governmental pension based on his or her own work in noncovered employment. However, the offset does not apply if the person receives, or is eligible to receive, the pension before December 1, 1982, and can meet the eligibility requirements for the social security dependents' benefit as they existed in January 1977. In a recent court case, Rosotsky V. Schweiker, a United States District Court found the present exception to the pension offset to be unconstitutional. The decision will be appealed. Retired workers who have some work credits under Social Security and some work credits under a foreign social insurance system, but not enough credit to qualify under either system, may have their credits combined if it would give them sufficient credit to qualify under Social Security. However, the United States must have a special agreement with the foreign social insurance system and it currently has such agreements with Italy, Switzerland, and West Germany. Also, free work credits are granted to persons of Japanese ancestry who were interned in the United States during World War II.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Proof of death, age, and relationship. For certain dependents, proof of support may be required.

Grant funds pay 5/6 of the first $18 of the average payment and then 50 percent to 60 percent of the balance within the Federal average maximum. If it is to the State's benefit, it may use the medicaid formula with no maximum (provided the State has an approved medicaid Plan) which may range from 50 to 83 percent Federal funds. The Federal share of payments for AFDC and the adult categories in Guam, Puerto Rico, and the Virgin Islands is determined by individual computation and subject to statutory ceilings.

All applications must meet standards of excellence in research and evaluation design. In general, the Office of Child support Enforcement (OCSE) intends to support the following types of projects: (1) Those which develop and demonstrate new financing mechanisms, adminstrative procedures, and technological innovations for improving the effectiveness and efficiency of child support enforcement programs at the State and local levels. RELATED PROGRAMS: 13.856, Microbiology and Infectious Diseases Research.

EXAMPLES OF FUNDED PROJECTS: Studies in asthma and allergic diseases concern the etiology, pathogenesis, diagnosis, prevention, and treatment of both naturally occurring and acquired allergic diseases. The objectives of this program are: to encourage collaboration between basic and clinical scientists; to provide a research environment favorable for such interaction; and to implement clinical application of adequately tested research findings and procedures. Centers are expected to have facilities and personnel capable of designing long term approaches either to the investigation of one or more major allergic disorder or to the basic mechanism of human allergic diseases. Research in immunologic diseases is designed to investigate the underlying mechanisms of diseases as well as applications of basic knowledge to the etiology, prevention, and management of immunologic disorders. Studies can be conducted from either of two disciplinary approaches - clinical immunology or immunopathology. Pertinent areas for study are the following: immune deficiency diseases that arise from primary defects, development, or maturation of the immue response or as secondary results from disorders affecting immune responses; clincial manifestations mediated by products of lymphocytes; diseases associated with immune complexes and autoimmune phenomena; and immunodermatology. Expamples include "Role of Microtubles in Allergy", "Mechanism of Virus Induced Asthma", "Resistance to Infectious and Neoplastic Disease," "Immune Response to Infectious Agents In JRA", "Genetic Factors In the Development of Atopic Disease."

Projects range from studies of microbial physiology and antigenic structure to collaborative trials of experimental drugs and vaccines. Program project grants and contracts are used to fund selected projects of high Institute relevance. The objectives of the program are to assist public and private nonprofit institutions and individuals to establish, expand and improve biomedical research and research training in infectious diseases and related areas; to assist public, private and commercial institutions to conduct developmental research, to produce and test research materials, and to provide research services as required by the agency for programs in infectious diseases.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: There is no precise limitation on the dollar value of research grants that may be awarded to any one investigator or institution. Research grants provide funds for salaries, equipment, supplies, travel and afford the collateral benefits of enriching the training and experience of research workers. Grantees are expected to be judicious in using grantee funds. The application form for a research grant sets forth specific terms and conditions and requires the signatures of the principal investigator and an official authorized to sign for the institution. The scientst and institutions are under an obligation to expend grant funds prudently for the purposes stated in the application and award document. Research Career Development Awards support the development of scientists during the formative stages of their careers and who demonstrate an outstanding research potential for careers of independent research in the sciences related to infectious diseases. National Research Service Awards (Individuals) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, National Research Awards (Institutional) may be made to institutions to enable them to make NRS awards to individuals selected by them. Each individual who receives an NRS award is obligated upon termination of the award to comply with certain service and pay back provisions.

ELIGIBILITY REQUIREMENTS:

A strong research impetus has been established for Alzheimer's disease and other dementias of aging. Other biomedical research on aging focuses on such areas as immunology, arthritis, and sleep. Recent studies indicate that some immune processes may compensate for age-related declines in other immune processes; that tamoxifen, an estrogen-blocking drug, may aid in the treatment of osteoarthritis; and that sleep apnea and its negative consequences affect a substantial number of older people. Recent behavioral studies indicate that mental decline with age is not inevitable. In fiscal year 1982, the Institute will continue studies in these and other areas; and will put further emphasis on research leading to health maintenance, prevention, and the diagnosis and treatment of diseases and disorders which result in admission to nursing homes. In fiscal year 1981, 411 competing and noncompeting research project grants were awarded. Estimated competing research project grant awards for fiscal years 1982 and 1983 are 62 and 115, respectively. An estimated 24 competing training awards will be funded in FY 1982, and 16 in FY 83.

RELATED PROGRAMS: 13.668, Special Programs for the Aging—Title IV—Training, Research and Discretionary Projects and Programs.

EXAMPLES OF FUNDED PROJECTS: 1) A research project grant to study neuronal proteins in Alzheimer's disease: This project also is investigating the relationship of presynaptic cholinergic deficiency to neurofibrillary changes. Analytical techniques of protein biochemistry and neuronal cell biology are used to study normal neurofilament proteins, abnormal paired helical filaments and other structural proteins in patients with Alzheimer's disease, age-matched control and in an experimental model. 2) A research project grant to study the effects of aging on T cell maturation: The study is based on a model of thymic maturation in which stem cells migrate to the thymus from bone marrow fetal liver, undergo partial educative maturation, and are exported to peripheral tissues where they gain full immunocompetence. 3) A research project grant to study the effects of exercise on the development of osteoporosis: A group of middle-aged dsubjects are participating in a regimented physical activity program. Bone mineral changes are monitored; dietary information is collected and blood studies conducted; and work capacity tests administered. 4) A research project grant to study age-related decreases in lectin-cholesterol acyltransferase activity (LCAT) and the relationship between LCAT activity and plasma lipid levels in the rat: Rat LCAT is isolated and an immunoassay procedure developed; age related parameters of plasma lipids are defined. 5) A geriatric medicine academic award to develop a comprehensive curriculum in geriatric medicine: The program will encompass all levels of medical education, including clinical fundamentals, basic science courses, and geriatric research opportunities. 6) A research grant on cognitive development and modifiability in adulthood: A series of short-term longitudinal studies is aimed at examining the extent of and conditions for modification of intellectual performance in old age. 7) A research grant on social change, life events, and aging: This project seeks to increase knowledge of how normative age-graded events emerge and are transformed by the historical dynamics of social change. It will also develop and refine quantitative methods for the analysis of time-dependent behavioral processes.

13.867 RETINAL AND CHOROIDAL DISEASES RESEARCH

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Public Health Service Act of 1912 as amended.

OBJECTIVES: Supports basic and applied research to elucidate the structure and function of the retina in health and disease which includes studies of the structure and metabolism of the photoreceptor cells and their relationship to the underlying pigment epithelium; the mechanism of the retina's response to light and the initial processing of visual information that is transmitted to the visual centers of the brain; inflammation of the uveal tract of the eye consisting of the iris, choroid, and ciliary body; and the vitreous humor. Also supports studies that are aimed at understanding such major causes of blindness as developmental and hereditary disorders of the retina; diabetic retinopathy and other vascular and circulatory abnormalities; myopia; tumors; diseases of the macula; retinal detachment; and inflammatory disorders, including uveitis. A number of clinical trials of the effects of treatment in certain retinal diseases, most notably diabetic retinopathy, are underway.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: There is no precise limitation on the dollar value of research grants that may be awarded to any one investigator or institution. Research grants provide funds for salaries, equipment, supplies, travel, and other expenses, and afford the collateral benefits of enriching the training and experience of research workers. Grantees are expected to be judicious in using grant funds. The application form for a research grant sets forth specific terms and conditions, and requires the signatures of the principal investigator and an official authorized to sign for the institution. The scientist and institutions are under an obligation to expend grant funds prudently for the purposes as stated in the application and award document. Small grant program supports pilot projects, testing of new techniques or feasibility studies of high risk research, which would provide a basis for more extended research. This program is designed to support: clinicians with limited research experience; recently trained or less experienced investigators; investigators whose research career was interrupted and is intended to be resumed; investigators changing field of research; investigators at minority institutions or located in a largely non-research environment; and established investigators needing quick support for a pilot project. Career Development Awards support the development of scientists during the formative stages of their careers and who demonstrate an outstanding research potential for careers of independent research in the science related to vision. National Research Service Awards (individuals) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, National Research Service Awards (Institutional) may be made to institutions to make NRS awards to individuals selected by them. Each individual who receives an NRS award is obligated upon termination of the award to comply with certain service and pay back provisions.

ELIGIBILITY REQUIREMENTS:

13.868 CORNEAL DISEASES RESEARCH

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Public Health Service Act of 1912 as amended.

OBJECTIVES: Included within this program for research are diseases of the cornea, which occur frequently and are perhaps the leading cause of blindness worldwide, and of the external ocular structures, including the conjunctiva and lids. One of the most difficult corneal diseases to treat is that caused by the herpes simplex virus. Often characterized by periodic acute recurrences, herpes simplex infections of the cornea account for more sickness and loss of vision than any other corneal infection in Western countries. Other conditions of concern in this program are inflammatory disorders of the cornea and external eye; dry eyes and tear abnormalities; disorders of the corneal epithelium; refractive problems and contact lenses; corneal edema, distrophies, and inherited disorders; corneal transplantation and injury and repair of the corneal stroma; and tumors and other problems of the lids, conjunctive and orbit. Research supported by the NEI related to corneal diseases includes studies of immunologic mechanisms, corneal opacification, edema and improved means of drug delivery. Other important areas of corneal research include epidemiologic investigations, studies of the tear film and tumor virology and immunology.

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Public Health Service Act of 1912 as amended.

OBJECTIVES: Although cataract surgery is one of the most successful operations performed, this condition remains among the leading causes of blindness in the United States. For this reason, the NEI is emphasizing research aimed towards the prevention and nonsurgical treatment of cataract. The NEI's cataract research program is concerned with a number of different types of cataracts of varying etiology, including aging, diabetes and congenital, metabolic, and genetic factors. Also of interest are cataracts occurring secondary to injury, radiation and other eye disorders; dislocated lenses; and accommodation and optical problems of cataract and aphakia. Considerable attention is being given to studies of the chemistry and biophysics of the normal lens.

13.870 GLAUCOMA RESEARCH

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Public Health Service Act of 1912 as amended.

OBJECTIVES: Although the numerous forms of glaucoma have diverse etiologies and include primary and secondary types, research concerns common to all the glaucomas are optic nerve and vision changes, the hydrodynamics of the aqueous humor and methods of medical and surgical treatment.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: There is no precise limitation on the dollar value of research grants that may be awarded to any one investigator or institution. Research grants provide funds for salaries, equipment, supplies, travel, and other expenses, and afford the collateral benefits of enriching the training and experience of research workers. Grantees are expected to be judicious in using grant funds. The application form for a research grant sets forth specific terms and conditions, and requires the signatures of the principal investigator and an official authorized to sign for the institution. The scientist and institutions are under an obligation to expend grant funds prudently for the purposes as stated in the application and award document. Career Development Awards support the development of scientists during the formative stages of their careers and who demonstrate an outstanding research potential for careers of independent research in the sciences related to vision. Small grant program supports pilot projects, testing of new techniques or feasibility studies of high risk research, which would provide a basis for more extended research. This program is designed to support: clinicians with limited research experience; recently trained or less experienced investigators; investigators whose research career was interrupted and is intended to be resumed; investigators changing field of research; investigators at minority institutions or located in a largely non-research environment; and established investigators needing quick support for a pilot project. National Research Service Awards (Individual) are made directly to approved applicants for research training in specified biomedical shortage areas. In addition, National Research Service Awards (Institutional) may be made to institutions to enable them to make NRS awards to individuals selected by them. Each individual who receives an NRS award is obligated upon termination of the award to comply with certain service and pay back provisions.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Research grant proposals eligible for support are those concerned with laboratory and clinical research on the causes, diagnosis, and prevention in the particular program area. Universities, colleges, hospitals, laboratories, Federal institutions, public or private nonprofit and for profit domestic institutions including State and local units of government are eligible to make application for research grants and career development awards. Foreign institutions may apply for research grants only. The proposal must receive favorable recommendations from the National Advisory Eye Council and the grantee must agree to administer the grant in accordance with prevailing PHS regulations and policies. NRS awards are provided for predoctoral and postdoctoral research training. Individual NRS awards may be made for applicants who hold a professional or scientific degree (M.D., Ph.D.,D.D.S., D.V.M., Sc.D., D.Eng., or equivalent degree). Institutional NRS awards may be made for both predoctoral and postdoctoral research training. Predoctoral awardees must have completed the baccalaureate degree. All applicants must be citizens of the United States, or be admitted to the U.S. for permanent residency. Individuals NRS awardees must be nominated and sponsored by a federal, public or private nonprofit institution having staff and facilities suitable to the proposed research training. Federal and nonprofit domestic organizations may apply for the institutional NRS grant. Refer to the NIH NRSA program guidelines for further information.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: (1) Research grants: No credentials or documentation required with application, except for those that the applicant feels will help establish the scientific worth of the proposal. (Career application credentials are the same as those for the individual and institutional NRS application.) (2) Individual NRS applications - The applicant's academic record, research experience, citizenship, institutional sponsorship, proposed area and plan of training, etc., must be included in the application. (3) Institutional NRS applications - The applicant institution must show the objectives, methodology and resources for the research training program, the qualifications and experience of directing staff, the criteria to be used in selecting individuals for award, and a detailed budget and justification for the amount of grant funds requested. This program is subject to the provisions of OMB Circular No. A-87.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Standard application forms as furnished by the Federal agency and required by OMB Circular No. A-102 must be used for the research and small grant programs. This Circular applies to those applicants which are State or local units of government. Also, consultation is available from Institute staff. Research grant and career applications from other than State or local units of government in general do not require preapplication coordination. Prior to making formal application to the NRS programs, individual NRS applicants must be nominated and sponsored by a Federal or nonprofit institution having staff and facilities appropriate to the proposed research training program.

Application Procedure: Institutions submit research grant proposals for basic and clinical research. These are reviewed for scientific merit, for evaluation of applicant qualifications, for the adequacy of the research environment, and for the significance of the problem to be studied. Institutions submit career proposals for development of scientists which are reviewed for an evaluation of the applicant's potential, and adequacy of the research training environment. A National Advisory Eye Council provides for final review. An application form, PHS-398, may be requested from the Division of Research Grants for research grant proposals and career proposals. EXAMPLES OF FUNDED PROJECTS: 1) A research project for the study of trabecular meshwork: objectives are to establish lines of trabecular endothelial cells in culture from glaucoma patients and normal people, to characterize the cells according to their structural and biological characteristics, to examine extracellular materials produced by the cells, and to study drug and hormone effects on the cells. 2) Three separate research projects - the objectives of each are to conduct a controlled clinical trial to establish the safety, efficacy and best uses of drugs controlling intraocular pressure and glaucoma: the drugs are timolol, carbonic anhydrase inhibitors, and combination of timolol epinehrine. 3) A research project to determine if the mechanism of optic nerve damage in glaucoma is due primarily to ischemia or to mechanical effects. Changes in axonal transport and ultra-structure are being monitored on monkey eyes subjected to elevations of intraocular pressure. 4) A research project to study compliance with glaucoma therapy asks if patients take their drugs as prescribed, how often they skip an application of eyedrops, and which times are most often missed. This study employs an microelectronic device, concealed in the drug dispenser, which records the time of delivery of each drop of the drug over a period of a month. 5) A research project for studying the physiology of aqueous humor dynamics by a clinical fluorophotometric methods. This project is determining the extent to which the various processes involved in controlling intraocular pressure are affected by drugs used to treat glaucoma. 6) A research project for studies of laser iridotomy: the objectives of this study are to test a new Q-switched ruby laser for iridotomy to relieve angel-closure glaucoma and to compare results with those obtained by use of an argon laser, and to establish treatment parameters in primates. The status of the eyes is being monitored by ophthalmologic, histochemical and ultrastructural procedures. The procedure will then be evaluated in clinical trial. 7) An individual National Research Service Award to develop en animal model for iris neovascularization will be made. Training will include devising reliable methods for producing neovascularization in cat eyes, measuring ocular oxygen tension and determining its role in neovascularization, and application of histologic and ultrastructural techniques to follow the progress of the induced disease.

EXAMPLES OF FUNDED PROJECTS: 1) A research project grant to examine the neural mechanisms of vision: the role of synaptic transmitter substances in the visual system. This study will include examination of the effects of neurotransmitter antagonists. 2) A research project grant to study the functional organization of the extrastriate visual cortex. This project is utilizing anatomical and electrophysiological approaches along with radioactive tracers to examine the internal organizations of four regions of the brain that have been identified as being important in vision. 3) A research project grant to characterize cone-dominated and rod-dominated visual systems - this project seeks by psychophysical means to examine how color vision occurs, as well as to destinguish the visual input of the rods, which is monochromatic, from the chromatic aspects of vision that originate from the cones. 4) A research project grant to study human oculomotor disorders. The approach will apply control systems analysis to quantitiative measurements of eye movements obtained in both clinical and experimental contexts. 5) A research project grant to measure visual acuity for grating and stereoscopic targets in infants and young children at high risk for developing amblyopia. Children with ocular disorders such as congential cotaract and strabismus will be tested before and at various times after treatment for these disorders to monitor effects on development of their visual capacities.

13.893 MECHANISMS OF ENVIRONMENTAL DISEASES AND DISORDERS

FEDERAL AGENCY: NATIONAL INSTITUTES OF HEALTH, DEPARTMENT OF HEALTH AND HUMAN SERVICES

AUTHORIZATION: Public Health Service Act, Section 301; Public Law 78-410, as amended; 42 U.S.C. 241.

OBJECTIVES: To gain a thorough understanding of the mechanisms involved in disease processes and to prevent or reduce disease caused by environmental agents. After a potential or real hazard is identified, the essential next step is a concerted effort to understand how tissue responds to pathological insult. Once the disease process is understood, means can be taken to either avoid, alter, or possibly correct the condition under which man becomes a victim of his environment. Developing an understanding of the biochemical and biological mechanisms of disease will contribute to the most efficient means of disease prevention; provide information regarding the relative susceptibility of people who are at higher risks (by virtue of their genetic background, nutritional status, preexisting disease state or lifestyle); improve the ability to predict long-term chronic effects; contribute to the development of sensitive assay systems; improve the ability to reliably extrapolate the results of laboratory animal studies to man and improve the capability of regulatory agencies to control general exposure to known hazards.

Assisted families are required to contribute at least 30 percent of their adjusted family income toward rent.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Any private owner (profit-motivated and nonprofit), cooperative, or an authorized Public Housing Agency (any State, county, municipality or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of housing for low-income families).

In the latter case, no application for housing may be approved by HUD unless HUD requirements implementing the provisions of Section 213 or the HCD Act have been satisfied. In the Section 8 New Construction and Substantial Rehabilitation Programs administered directly by HUD, proposals are generally submitted in response to Notifications of Fund Availability published for specific allocation areas, based on the area's Fair Share Allocations. Selections are generally made on a competitive basis. Previously submitted "pipeline" proposals which are of high quality and were found approvable but not funded in the prior fiscal year are reviewed first, when any new contract authority becomes available. If additional authority remains, HUD may consider preapproved sites, and in certain areas, permit selection of developers by local governments. RELATED PROGRAMS: 14.219, Community Development Block Grants/Small Cities Program.

EXAMPLES OF FUNDED PROJECTS: Examples of funded projects are as follows: a. Boston, Massachusetts. The City has received preliminary approval of an action grant to assist in the development of the Crosstown industrial project located between the Archer and Roxbury neighborhoods. Community Development Corporation (CDC), a local development corporation, will construct a new manufacturing facility to house the expansion of Healthco, Inc., creating 200 new permanent jobs and retaining an additional 130 jobs. The action grant of $1,585 thousand to the City of Boston is to be used for land acquisition, relocation, demolition, and site preparation. The property then will be transferred to CDC, which will utilize a $5 million industrial revenue bond issue, grant funds from the Economic Development Administration, and City general obligation bonds to construct a 160,000 square-foot facility to be leased by Healthco. The City will contract with Opportunities Industrialization Centers and the local CETA agency to recruit and train new workers. A minimum of one-third of all new permanent jobs will go to low-income and minority persons. b. Cressona, Pennsylvania. On May 7, 1979, HUD announced preliminary approval of an action grant of $3.3 million for the Borough of Cressona to be used as a loan from the Borough to the Cressona Aluminum Company. Together with loans from the Economic Development Administration, the State of Pennsylvania, and private financing, the action grant enabled the Cressona Aluminum Company to acquire, improve, and reopen an old Alcoa Aluminum extrusion plant that had closed two years before. As the plant builds to full operation and productivity, a total of 600 persons will be employed. Total private investment will exceed $15 million. Proceeds from the repayment of action grant funds, plus interest, will be shared by the Borough with other distressed communities and will be used for other economic development activities. c. San Antonio, Texas. On April 6, 1978, HUD announced preliminary approval of an action grant of $6.5 million to assist in land acquisition for a 522-room hotel, retail space (50 percent to be occupied by minority entrepreneurs), parking garage, and multilevel pedestrian walkway. This Alamo Plaza-Paseo del Rio linkage project will be part of a comprehensive revitalization of six blocks in the heart of San Antonio's historic downtown area. Groundbreaking for the hotel site occured during June 1979, and all components of the project are now completed. The Mexican-American Unity Council, an Hispanic community development corporation, will have an equity ownership in the hotel along with Ira Hardin Company and AFCO Realty Associates. The Council also will coordinate CETA employment referrals for positions in the hotel. A total of $37.1 million of private funds will be invested in the complex, generating 770 new permanent jobs.

CRITERIA FOR SELECTING PROPOSALS: A. Cities and Urban Counties. Proposals are funded on the basis of the following criteria. (1) The primary criterion is the comparative degree of physical and economic distress among applicants, as measured by the differences in the following factors, which are assigned relative weights as follows: (a) the percentage of their total housing stock that was built prior to 1940 (50 percent); (b) the percentage of their total current population that was in poverty in 1970 (30 percent); and (c) the degree to which their population growth rate lags behind that of all metropolitan cities (20 percent). (2) The comparative degree of physical and economic deterioration of applicants, including per capita income, unemployment, and job lag/decline. (3) The demonstrated performance of the applicant in carrying out housing and community development programs. (4) The impact of the proposed project on the employment base of the community, particularly jobs accessible to lower income persons and minorities. (5) The nature and extent of financial participation by private entities in the proposed project. (6) The extent of financial assistance to be made available by the State. (7) The nature and extent of financial participation by other public entities in the proposed projects. (8) The impact of the proposed project on the physical, fiscal, or economic deterioration of the community. (9) The feasibility of accomplishing the projects in a timely fashion within the total resources which will be provided. (10) The extent of minority business participation will have. (11) The impact of the project in increasing energy efficiency or conserving scarce fuels, and several other factors. B. Pockets of Poverty Communities. The Secretary will not use as the primary criterion the comparative degree of distress, but rather the comparative degree of distress among pockets of poverty as measured by the eligibility criteria for cities not meeting minimum standards, and by the comparative benefits to be provided to the low- and moderate-income residents of the pocket of poverty. Proposals for pockets of poverty will be considered separtely from those submitted by distressed cities and urban counties. However, the selection criteria of (3) through (11) above supplemented by additional criteria will be used to select projects for funding. Each project submitted by a jurisdiction eligible on the basis of a pocket of poverty must compare favorably on its own merits with any other action grant project to be selected for funding.

OBJECTIVES: To carry out research and demonstration projects of high priority and pre-selected by the Department to improve the operations of the Department's programs.

TYPES OF ASSISTANCE: Project Grants (Cooperative Agreements).

USES AND USE RESTRICTIONS: Funds are principally awarded to competitively solicited research projects planned to meet the needs of the Department of Housing and Urban Development. Research relating to: energy conservation; national housing needs; evaluation of existing housing and community development programs; improving the environment; and improving the management and planning of State and local governments are areas eligible for award of grants or cooperative agreements. Grants and cooperative agreements are available to State and local governments, industry, and nonprofit and academic institutions. UNSOLICITED PROPOSALS: Unsolicited proposals are reviewed in accordance with this program's "Guidelines for Unsolicited Proposals," but because there are no undesignated funds, relatively few can be funded, and only by displacing an already planned project. Cost-sharing is required. JOINT FUNDING: This program is considered suitable for joint funding with closely related Federal financial assistance programs in accordance with the provisions of OMB Circular No. A-111, but jointly-funded projects seldom arise because coordination with pre-planned research is difficult, and because there are no undesignated funds in the program. For programs that are not identified as suitable for joint funding, the applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved. In general, funds are not available for: (1) research of primarily local nature and benefits, (2) institutional support or operating funds, and (3) development of marketable products.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: State and local governments, public and/or private profit and nonprofit organizations which have authority and capacity to carry out projects.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: Capacity and capability of applicant to perform research by grant or cooperative agreement under this program.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Contact the Office of the Assistant Secretary for Policy Development and Research for unsolicited proposals. Contact the Office of Procurement and Contracts for information related to competitive solicitations.

Application Procedure: Response to HUD request for proposals issued by the Office of Procurement and Contracts is the normal method. Unsolicited proposals that are original in concept and meet program objectives are also considered; however, funds are not set aside specifically for this purpose, and unsolicited proposals must compete with and displace HUD-originated research requirements to be considered for funding. Unsolicited proposals require cost-sharing (proposer bears a share of all cost; No fee is allowed). Grants under this program are subject to modified provisions of OMB Circular No. A-110 (more intensive planning and progress reporting; cost-reimbursement upon approved progress is preferred payment method); cooperative agreements are governed by special, OMB-approved agreement provisions drawn from A-110 and other sources to meet needs of this program.

Award Procedure: The applicant will negotiate with HUD on the award amount and scope of work of the proposal. The headquarters office closely monitors research performance.

Deadlines: As specified in request for proposals.

Range of Approval/Disapproval Time: As identified in request for proposals for competitive awards; 60 to 120 days for unsolicited proposals.

Appeals: Office of the Assistant Secretary for Policy Development and Research for unsolicited proposals. Office of Procurement and Contracts for all agreement matters.

Renewals: As provided in agreement arrangements, if any.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: Agreements may be either cost reimbursable or fixed price in nature. Unsolicited proposals resulting in an award are required to be cost shared.

Length and Time Phasing of Assistance: As specified in the contractual agreement. Awards usually will not exceed twelve months.

POST ASSISTANCE REQUIREMENTS:

Reports: As specified in agreements.

Audits: Accounts and records of the project are subject to audit by the Federal government at any time. The number of audits depends on the length of the project and the nature of the agreement. A final audit will be made for most agreements.

TYPES OF ASSISTANCE: Project Grants (Contracts); Training; Advisory Services and Counseling; Dissemination of Technical Information.

USES AND USE RESTRICTIONS: For HIP, the program is mainly devoted to housing improvement. The Bureau does, however, build an entire house in situations where no other program will meet the need, i.e., extremely isolated areas or reservations where only a very small number of homes are needed; development and implementation of Resident Training and Counseling Programs (RTCP) for occupants of Indian housing projects; assistance is provided to Indian tribes to establish housing plans and determine the extent and use of BIA Housing Improvement Program; technical and administrative assistance to local Indian housing authorities in the development and management of federally funded Indian housing projects. For HUD, assistance is restricted to Indian tribes that are able to establish a housing authority and carry out programs under the U.S. Housing Act of 1937, as amended.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: For HIP, Indians in need of financial assistance who meet the eligibility criteria of the HIP regulations (25 CFR, Subchapter X, Part 261). For HUD, Indians who meet the income criteria and other rules and regulations of the legally established local Indian housing authorities.

Beneficiary Eligibility: Same as Applicant Eligibility.

Credentials/Documentation: For HIP, Indians must furnish information required by 25 CFR, Subchapter X, Part 261, basically proving Indian eligibility under Federal regulations and financial inability to obtain assistance for repairs or new housing. For HUD, tribal resolutions, State or Federal laws establishing Indian housing authorities under the U.S. Housing Act of 1937, as amended, and rules and regulations of the Department of Housing and Urban Development. For those programs that do not require a housing authority for assistance, proper documentation as required by the particular lending or guaranteeing entity.

Length and Time Phasing of Assistance: Not applicable.

POST ASSISTANCE REQUIREMENTS:

Reports: For HIP, the BIA keeps starts and completions on all housing programs within the jurisdiction of each Area Office for repairs and construction. These reports are due each quarter.

Records: For HIP, when the BIA contracts with an Indian tribe for services, the tribe is required to maintain adequate records in order to make the appropriate reports. For HUD, extensive record keeping is required of local Indian housing authorities.

FINANCIAL INFORMATION:

Account Identification: 14-2100-0-1-452.

Obligations: (Total HIP program costs including grant funding, salaries, and expenses) FY 81 $22,572,000; FY 82 est $29,810,000; and FY 83 est $23,289,000.

Range and Average of Financial Assistance: For HIP, maximum of $20,000 for repairs; $2,500 for temporary and emergency housing; $5,000 for a down payment to obtain loan for housing; and $45,000 for new standard housing ($55,000 in Alaska only). The average cost for repair is approximately $10,000. Average new housing construction is approximately $29,000.

PROGRAM ACCOMPLISHMENTS: For HIP, in fiscal year 1980 over 4,000 homes have been repaired and some 800 new houses built. For HUD, as of September 30, 1980, 39,500 HUD assisted units were completed and under management by Indian housing authorities.

EXAMPLES OF FUNDED PROJECTS: Quileute Demonstration Project-Quileute Reservation, approximately one mile outside of La Push, Washington, 24 single units. Four elderly units. (These units are two duplex units) This is one of the finest examples of HIP which can produce a quality house taking into consideration local wishes and desires. Eighteen units in Little Diamede, Alaska. Prior to HIP undertaking there was no housing in this area. No other federally-assisted housing program was able to meet this need. The impact of this housing in the area has been significant. Not only the Natives have been able to live in decent housing but the effort proved decent housing could be a reality in remote Alaska Villages. Thus, as a result of this HIP effort housing programs started in Alaska Villages. Twenty units on Tonto-Apache Reservation in Payson, Arizona. These 20 units are also a fine example of HIP accomplishments with relatively low-cost. The homes are of good quality with a fine design. They are one to five bedroom units.

CRITERIA FOR SELECTING PROPOSALS: There are no proposals in the HIP per se: Requests for HIP funding are made by tribes for the repair and renovation of their existing Indian housing. The repair and renovation is accomplished by direct grants. Priorties are set by tribes and families to receive assistance under the HIP and are selected by tribes taking into account the family size, income, condition of present housing and the availability of other federally-assisted housing programs.

FINANCIAL INFORMATION:

Account Identification: 14-1611-0-1-303.

Obligations: (Salaries and expenses) FY 81 $538,000; FY 82 est $565,000; and FY 83 est $257,533.

Range and Average of Financial Assistance: $13 to $171; $20 (value of fish donated).

PROGRAM ACCOMPLISHMENTS: Approximately 18,060 farm ponds averaging about 1.8 acres in size were stocked in fiscal year 1980. As part of the national sport fishery, farm ponds have supported more than 50 million angler days of fishing annually and it is estimated that about one-fourth of this fishery has been supported by the Federal Farm Pond Program.

REGULATIONS, GUIDELINES, AND LITERATURE: None.

INFORMATION CONTACTS:

Regional or Local Office: See Catalog address appendix.

Headquarters Office: Fish and Wildlife Service, Department of the Interior, Washington, DC 20240. Telephone: (202) 653-8746. Contact: William Daugherty, Chief, Division of Hatcheries and Fishery Resource Management.

RELATED PROGRAMS: 15.604, Fishery Research—Information; 15.605, Fish Restoration; 15.608, Sport Fish Technical Assistance.

EXAMPLES OF FUNDED PROJECTS: 100 channel catfish stocked in 1 acre privately-owned pond. There are 50 largemouth bass, and 500 bluegill, stocked in 1 acre privately-owned pond. There are 75 largemouth bass, 75 channel catfish, 525 bluegill, and 225 redear sunfish stocked in 1 1/2 acre pond. There are 200 channel catfish stocked in 2 acre pond. There are 25 channel catfish stocked in 1/4 acre pond.

CRITERIA FOR SELECTING PROPOSALS: The Service participates in the farm pond program by providing the appropriate species of fish, free of charge, to individuals owning ponds developed under the Soil Conservation Service's pond program. Ponds constructed under other programs and privately-constructed ponds are also considered for stocking. The program functions in the 48 contigious States with major emphasis in those of the Southeast. At the present time, the Service stocks only fingerling warmwater fish (largemouth bass, bluegill, redear sunfish, and channel catfish in ponds administered under the farm pond program. Only those ponds considered by qualified biologists (Federal or State) as suitable for sustaining fish populations will be stocked. If a pond is commercialized, already contains fish, or is less than 1/4 acre in size, it does not qualify for stocking and the application is rejected. State stocking policies are given precedence over Service requirements in instances where State standards are more restrictive. Service participation is presently limited to the initial stocking of farm ponds. If subsequent stockings are necessary, the pond owner must obtain his fish from other sources or a commercial dealer. When proper management dictates the reclaiming of a pond by draining or the removal of all fish by chemical means, the pond may be considered new and the owner may request an initial stocking of fish. Current production from National Fish Hatcheries generally is not sufficient to meet priority needs for stocking waters on Federal, Indian, and State lands open to the public for fishing. The Service's Regional personnel review each application on fish stocking and advise each pond owner as to availability of fish for stocking in private waters. If fish cannot be supplied from a National Fish Hatchery, the Regional Office may provide assistance in locating commercial sources for fish.

They contain 49,000 measured drawings, 70,000 photographs, and 30,000 pages of written data for over 20,000 buildings. In fiscal year 1980, 322 buildings were recorded. It is estimated that a similar number of structures will be recorded in succeeding years.

REGULATIONS, GUIDELINES, AND LITERATURE: "Recording Historic Buildings" (procedural guide) available from the Government Printing Office for $6.40; list of available National and State catalogs HABS, Selection Series, HAER Inventories and Rehab-Action publications, free.

INFORMATION CONTACTS:

Regional or Local Office: National Park Service Regional Office.

Headquarters Office: Robert J. Kapsch, Chief, Historic American Buildings Survey/Historic American Engineering Record, National Park Service, Department of the Interior, Washington, DC 20240. Telephone: (202) 272-3527. (Use same 7-digit number for FTS.)

RELATED PROGRAMS: 15.904, Historic Preservation Grants-In-Aid; 15.910, National Natural Landmarks Program; 15.912, National Historic Landmark; 15.914, National Register of Historic Places; 15.915, Technical Preservation Services; 39.006, National Historical Publications and Records Grants.

EXAMPLES OF FUNDED PROJECTS: The structural and mechanical systems of the Auditorium Building in Chicago were recorded by NAER in 1979-80 with the cooperation of Roosevelt University, the Illinois Department of Conservation, and the Graham Foundation of Chicago. Designed by Alder and Sullivan, the building is a National Historic Landmark recognized not only for its outstanding design but also for its lesser known but significant construction technology. Gunston Hall in Virginia was the subject of a 1981 HABS Study. The mansion is a superb example of 18th century Georgian architecture and is notable for the interior carved detail and woodwork executed by William Buckland. It is also a National Historic Landmark. Cosponsors for the project were the Board of Regents of Gunston Hall and the National Society of the Colonial Dames of America. The San Francisco Cable Car System was documented for HAER by the National Park Service, Western Regional Office in 1981. Cosponsors for the project were the City of San Francisco and the Urban Mass Transit Authority. A major Rehabilitation of this National Historic Landmark is scheduled for 1982. Prior to that date, documentation will be assembled on the car barn and the track system and driving mechanism. The Department of the Army is sponsoring an historic structures inventory of the United States Military Academy at West Point. Over 1300 buildings and monuments located within the 1500 acres which have been designated a National Historic Landmark will be inventoried, and all nationally significant structures will be recorded to HABS standards.

CRITERIA FOR SELECTING PROPOSALS: Architectural and engineering merit and historical association constitute the basic criteria. Structures are selected which are significant in the development of architecture or engineering regionally or nationally, or which illustrate distinctive historical and technical contributions of cultural or ethnic groups, or which demonstrate new directions of concern such as minority neighborhoods, landscape design and architectural periods which have previously attracted little attention. The amount of non-Federal money available is also an important consideration.

Certain landmarks are also made eligible for Federal tax benefits and protections. National Historic Landmarks are generally selected from regularly-programmed theme studies.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Anyone may suggest to the State Historic Preservation Officer in his State that a property be considered for inclusion in an appropriate National Historic Landmark theme study, provided the property has potential national significance with relation to some broad facet of American history. Owner of property may be individual, government, or corporate body. Properties of only State or local significance do not qualify.

15.914 NATIONAL REGISTER OF HISTORIC PLACES

(National Register)

FEDERAL AGENCY: NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

AUTHORIZATION: National Historic Preservation Act of October 15, 1966, Public Law 89-665, 16 U.S.C. 470, 80 Stat. 915 et seq. (1970 edition); Executive Order 11593 of May 13, 1971; Tax Reform Act of 1976, Public Law 94-455; Public Law 94-442; 90 Stat. 1519; Revenue Act of 1978; Public Law 95-600; National Historic Preservation Act Amendements of 1980; Public Law 96-515; 16 USC 470; Tax Treatments Extension Act of 1980; Public Law 96-541, Economic Recovery Tax Act, Public Law 97-340.

OBJECTIVES: To expand and maintain the National Register as a planning tool and source of information on sites, buildings, districts, structures, and objects of historical, architectural, engineering, archeological and/or cultural significance by assessing the significance of properties and by making the contents of the National Register available to the public; to coordinate with Federal agencies and the Advisory Council on Historic Preservation in the implementation of laws and policies pertaining to historic preservation; to establish liaison with and give guidance to communities under Title I of the Housing and Community Development Act of 1974 (see 14.218); and to make certain certifications with respect to the historic character of buildings and structures, the rehabilitation of historic buildings and structures, and the preservation criteria of State and local statutes.

TYPES OF ASSISTANCE: Advisory Services and Counseling.

USES AND USE RESTRICTIONS: Professional advice is provided in determining whether a property qualifies for inclusion in the National Register according to the Criteria for Evaluation contained in 36 CFR Part 60. Listing does not affect the range of actions an owner may take, as long as Federal financing is not involved and no governmental unit receives any authority or control over the property, including its use and disposition. However, if a Federal project might have an effect on a property listed or eligible for listing, the agency involved must provide the Advisory Council on Historic Preservation a reasonable opportunity to comment pursuant to 36 CFR Part 800. Registered properties also become eligible to receive grants from the Historic Preservation grant-in-aid program of the Department of the Interior (see 15.904), to receive home improvement loans from the Department of Housing and Urban Development under Title I of the National Housing Act as amended on October 18, 1974, or to participate in the community grant program provided by the Housing and Community Development Act of 1974. Major Federal tax advantages can be received on certain rehabilitation expenditures for "certified historic structures" and for charitable contributions for conservation purposes of partial interests in historic properties.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Eligible applicants are the States and territories as defined in the National Historic Preservation Act, operating under programs administered by State Historic Preservation Officers appointed by the Governors (listed in Appendix IV of the Catalog); Federal agencies required to list and consider historic properties within their jurisdiction as a result of the National Environmental Policy Act of 1969 and Executive Order 11593, operating under programs administered by representatives (listed in Appendix IV of the Catalog) appointed by the heads of the agencies, and in States without approved State Historic Preservation Programs, persons and local governments. Applicants eligible for Federal Tax benefits include owners of individually listed properties and properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Beneficiary Eligibility: Public and private owners of historic properties listed in the National Register of Historic Places or of properties certified by the Secretary of Interior as being historic and in a district certified as historic.

Credentials/Documentation: Nominations are submitted on standard nomination forms provided upon request to the State Historic Preservation Officers and the Federal Representatives, who must certify that each property was properly nominated. Letters of request for determinations of eligibility must be adequately documented as described in Appendix A of 36 CFR Part 63. Requests for certification of historic properties must be documented as described in Section 67.4 of 36 CFR Part 67 and requests for certification of State and local statutes must be documented as described in Sec. 67.8 of 36 CFR Part 67. To participate in the program, each State must have an approved review committee, an approved State staff, and an accepted statewide plan. Governors (or their designated Plan review agencies) must be given an opportunity to review the State Plan pursuant to Part III, Attachment A of OMB Circular No. A-95 (revised).

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: For National Register nominations the signature of the State Historic Preservation Officer on the nomination form certifies that the State review committee has approved the nomination and that all applicable procedures, including notification to the property owner at least once during the nomination process, have been followed. The signature of the Federal Representative on the nomination form certifies that the property has been nominated in compliance with Executive Order 11593, and that the State Historic Preservation Officer has been allowed 90 days in which to present the nomination to the State Review Board and to evaluate its significance. Documentation for Tax Reform Act certification of statutes must be submitted to the appropriate State Historic Preservation Officer by the authorized representative of the government that enacted the statute.

Application Procedure: After the property is approved by the State Historic Preservation Officer or Federal Representative, the nomination form or letter of request for a determination of eligibility should be forwarded to the Keeper of the National Register, National Park Service, Department of the Interior, Washington, DC 20240. Nominations submitted for review are announced in the Federal Register to provide a period of comment. Documentation for certification of State and local statutes should be forwarded to the Keeper.

Award Procedure: The professional review staff of the National Register determines whether the properties meet the National Register criteria as contained in 36 CFR Part 60. Properties that meet the criteria are then officially listed in the National Register and become eligible for Federal tax benefits.

Deadlines: See program 15.904, Historic Preservation Grants-in-Aid.

Range of Approval/Disapproval Time: After nomination by State, generally 45 days at Federal level.

Appeals: A nomination returned to the States or Federal agencies may be resubmitted, depending upon the reason for its rejection.

CRITERIA FOR SELECTING PROPOSALS: CRITERIA FOR EVALUATION: The following criteria are designed to guide the States and the Secretary of the Interior in evaluating potential entries (other than areas of the National Park System and National Historic Landmarks) to the National Register: The quality of significance in American history, architecture, archeology, and culture is present in districts, sites, building, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and: (A) that are associated with events that have made a significant contribution to the broad patterns of our history; or (B) that are associated with the lives of persons significant in our past; or (C) that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or (D) that have yielded, or may be likely to yield, information important in prehistory or history. Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. However, such properties will qualify if they are integral parts of districts that do meet the criteria or if they fall within the following categories. (A) a religious property deriving primary significance from architectural or artistic distinction or historical importance; or (B) a building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or (C) a birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building directly associated with his productive life; or (D) a cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or (E) a reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; or (F) a property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance, or (G) a property achieving significance within the past 50 years if it is of exceptional importance.

Technical Preservation Services through the regional office is responsible for the review of all grant-assisted acquisition and development projects funded under the National Park Service grants-in-aid program (15.904). Grant project reports or case studies are also published and distributed to State Historic Preservation Offices so that both site-specific information and responsible general approaches may be shared throughout the program. Technical Preservation Services through the regional offices is responsible for the review and evaluation of rehabilitation proposals and certification of work for certified historic structures under the Tax Reform Act of 1976, the Revenue Act of 1978, and the Economic Recovery Tax Act of 1981. Technical Preservation Services through the regional offices is responsible for the review of rehabilitation and reuse proposals submitted with State and local government applications for the transfer of federally-owned surplus historic properties. Technical Preservation Services provides general technical assistance to private organizations, individuals, and local governments. Evaluate the inspection reports prepared by the regional offices and compile them for an annual report to Congress on the status of endangered and threatened national historic landmarks. Technical Preservation and the National Register Division developed a major outreach effort to explain the new tax benefits for commercial historic properties. For fiscal year 1982, the National Park Service and the National Trust for Historic Preservation will be cosponsors for 12 conferences in major cities across the country to explain the new tax program.

(Land and Water Conservation Fund Grants)

FEDERAL AGENCY: NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

AUTHORIZATION: 16 U.S.C. 1-4 et seq. Land and Water Conservation Fund Act of 1965; Public Law 88-578; 78 Stat. 897; as amended by Public Law 90-401 (82 Stat. 354); Public Law 91-485 (84 Stat. 1084); Public Law 91-308 (84 Stat. 410); Public Law 92-347 (86 Stat. 460); Public Law 93-81 (87 Stat. 178); Public Law 94-422 (90 Stat.1313); and Public Law 95-42 (91 Stat. 210).

OBJECTIVES: To provide financial assistance to the States and their political subdivisions for the preparation of comprehensive statewide outdoor recreation plans and acquisition and development of outdoor recreation areas and facilities for the general public, to meet current and future needs.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: Acquisition and development grants may be used for a wide range of outdoor recreation projects, such as picnic areas, inner city parks, campgrounds, tennis courts, boat launching ramps, bike trails, outdoor swimming pools, and support facilities such as roads, water supply, etc. Facilities must be open to the general public and not limited to special groups. Development of basic rather than elaborate facilities is favored. Fund monies are not available for the operation and maintenance of facilities. Grants are also available to States only for revising and updating existing State outdoor recreation plans, preparation of new plans and for statewide surveys, technical studies, data collection and analysis and other planning purposes which are clearly related to the refinement and improvement of the State outdoor recreation plan. JOINT FUNDING: This program is considered suitable for joint funding with closely related Federal financial assistance programs in accordance with the provisions of OMB Circular No. A-111. For programs that are not identified as suitable for joint funding, the applicant may consult the headquarters or field office of the appropriate funding agency for further information on statutory or other restrictions involved.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: For planning grants, only the State agency formally designated by the Governor or State law as responsible for the preparation and maintenance of the Statewide Comprehensive Outdoor Recreation Plan is eligible to apply. (Treated as States in this regard are the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, and Guam.) For acquisition and development grants, the above designated agency may apply for assistance for itself, or on behalf of other State agencies or political subdivisions, such as cities, counties, and park districts. Additionally, Indian tribes which are organized to govern themselves and perform the function of a general purpose unit of government qualify for assistance under the program. Individuals and private organizations are not eligible.

Beneficiary Eligibility: The general public. For planning grants, same as Applicant Eligibility.

Credentials/Documentation: The State liaison officer, appointed by the Governor to administer the program in the State, must furnish assurance that the project is in accord with the State Comprehensive Outdoor Recreation Plan; i.e., that it meets high priority recreation needs shown in the action program portion of the plan. The State's apportionment balance of fund monies must be adequate for the project, and the sponsoring agency must permanently dedicate the project to public outdoor recreation and assume responsibility for operation and maintenance. State Plans must cite the State's legal authority to participate in the Land and Water Conservation Fund program. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments. Governors (or their designated Plan review agencies) must be given an opportunity to review the State Plan pursuant to Part III, Attachment A of OMB Circular No. A-95 (revised).

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Applications are subject to State and areawide clearinghouses review pursuant to procedures in Part I, Attachment A of OMB Circular No. A-95 (revised). The standard application forms furnished by the Federal agency and required by OMB Circular No. A-102 must be used for this program. Applicant is required to furnish basic environmental information or evaluation. Assessment by the National Park Service will determine whether an environmental impact statement will be prepared.

Application Procedure: Project proposals are submitted to the Service through the State liaison officer designated by the Governor. The State liaison officer has the initial prerogative of determining acquisition and development project eligibility, priority need, and order of fund assistance within the State.

Award Procedure: Proposals are reviewed by regional office, where final action may be taken. Notification of awards must be made to the designated State Central Information Reception Agency in accordance with Treasury Circular 1082.

Deadlines: None.

Range of Approval/Disapproval Time: Approximately 20 days for acquisition and development projects; 60 days for planning projects.

Appeals: State may appeal to the Secretary of the Interior.

Renewals: Project agreements may be amended to change the scope, amount, or duration. Must be approved by the Service.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: The Land and Water Conservation Fund Act specifies that not more than 50 percent of the project cost may be federally financed. Under certain conditions, all or part of the project Sponsor's matching share may be from certain other Federal assistance programs, such as Title I Community Development, Appalachia and all other Regional Commissions. Forty percent of the first $225 million; thirty percent of the next $275 million; and twenty percent of all additional appropriations is apportioned equally among the States. The remaining appropriation is apportioned on the basis of need. This program has maintenance of effort (MOE) requirements, see funding agency for further details.

Length and Time Phasing of Assistance: Funds are available for obligation during the fiscal year in which appropriated and for the two following fiscal years. The assistance period for individual projects varies and may be extended. Complex projects may be broken down into stages, with one being initially approved and the remainder qualified for activation at a later date. Except for project preparation costs, all costs must be incurred within the project period. Planning projects may not be phased.

POST ASSISTANCE REQUIREMENTS:

Reports: State inspection reports are submitted triennially on completed projects stating whether the properties acquired and/or developed with fund assistance are used in accordance with the agreement. For planning projects, end products are specified in the application for assistance. Reports are required with billings.

Audits: Regular internal reviews by the Department's Office of Inspector General. Each State is audited at least once every two years. States are to provide for a system of periodic internal review.

Records: Maintain records to facilitate audit, including records that fully disclose the amount and disposition of assistance; the total cost of the project; and the amount and nature of that portion of the cost supplied by other sources.

FINANCIAL INFORMATION:

Account Identification: 14-5005-0-2-303.

Obligations: (Grants) FY 81 $174,711,000; FY 82 est $0; and FY 83 est $0.

15.919 URBAN PARK AND RECREATION RECOVERY PROGRAM

FEDERAL AGENCY: NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

AUTHORIZATION: Urban Park and Recreation Recovery Act of 1978, Title 1, Public Law 95-625; 16 U.S.C. 2501-2514.

OBJECTIVES: Federal grants to economically hard pressed communities specifically for the rehabilitation of critically needed recreation areas and facilities, and development of improved recreation planning.

TYPES OF ASSISTANCE: Project Grants.

USES AND USE RESTRICTIONS: Recovery Action Program grants are matching grants (50 percent Federal-50 percent local) to local governments for the development of local park and recreation system recovery plans. Eligible activities include resource and needs assessments, coordination, citizen involvement and planning, and program development activities to encourage public definition of goals. Recovery Action Program grants are chiefly intended to assist local efforts to develop priorities and strategies for overall recreation system recovery. State, local and private funds may be used as the non-Federal share of project costs. In addition, two types of Federal funds may be used as part of a local match: General Revenue Sharing (Treasury Department) and Community Development Block Grant (CDBG) program funds (Department of Housing and Urban Development). Section 1009 of the UPARR Act prohibits use of any other type of Federal grant to match UPARR grants. All properties assisted through this program must be open to the public. Rehabilitation grants are matching capital grants (70 percent Federal-30 percent-local) to local governments for the purpose of rebuilding, remodeling, expanding, or developing existing facilities. Funds may not be used for routine maintenance and upkeep activities nor may they be used for acquisition. In fiscal year 1982 the rehabilitation funds will not be available. Innovation grants are matching grants (70 percent Federal-30 percent local) to local governments to cover costs of personnel, facilities, equipment, supplies or services designed to demonstrate innovative and cost effective ways to enhance park and recreation opportunities at the neighborhood level. Innovative grant funds may be used to address common problems related to facility operations and the delivery of recreation services. These funds may not be used for routine operation and maintenance activities. Innovative grant awards nationwide are limited to ten percent of the total annual authorization for the Urban Park and Recreation Recovery program.

ELIGIBILITY REQUIREMENTS:

Applicant Eligibility: Eligible applicants are cities and counties meeting the eligibility requirements and listed in the October 9, 1979, Federal Register. Eligibility is based on need, economic and physical distress, and the relative quality and condition of urban recreation facilities and systems. Jurisdictions which are located within standard metropolitan statistical areas that are not on the eligibility listing may apply for discretionary funds provided that these grants are in accord with the intent of the program. These discretionary funds are limited to 15 percent of the funds available annually for rehabilitation, innovation and recovery action program grants. Congress has specified in the fiscal year 1982 Interior Appropriations Act (Public Law 97-100) that fiscal year 1982 grant funds ($7.7 million) may be used only "for supplemental grants to existing innovation grants". This means that, for 1982, only those localities that have previously received innovation grants will be eligible to compete for these funds.

Beneficiary Eligibility: Same as Applicant Eligibility; the general public.

Credentials/Documentation: Jurisdictions must have an approved Recovery Action Program on file with the Service in order to compete for rehabilitation and innovation grants. This document outlines the high priority recreation needs of jurisdictions and is a step toward good recreation planning. The plans must be submitted to and approved by National Park Service regional offices before a jurisdiction can apply for funding. Costs will be determined in accordance with OMB Circular No. A-87 for State and local governments.

APPLICATION AND AWARD PROCESS:

Preapplication Coordination: Applications are subject to State and areawide clearinghouses review pursuant to procedures in Part I Attachment A of OMB Circular No. A-95 (Revised). In order to reduce the amount of time and documentation needed for a formal application, and to foster the competitive aspects of the UPARR program, a preapplication procedure is used. (a) The preapplication should provide information adequate to guide proposal selection. Grants will be awarded in accordance with the availability of funds. Funding for an approved grant will not be increased from subsequent yearly appropriations. (b) Applicants are encouraged to discuss their proposals with their NPS Regional Office to determine basic eligibility and appropriateness prior to submitting a preapplication. If a State is assisting the applicant in preapplication preparation, providing a source of matching share, or giving technical assistance, the State may wish to assist in submission of the preapplication to the appropriate NPS Regional Office.

Application Procedure: Preapplication shall be submitted to the appropriate National Park Service Regional Office by the chief elected executive officer of the applicant jurisdiction. Only basic information should be submitted at this time. The preapplication must include those items as set forth in the Preapplication Handbook available from any National Park Service Regional Office.

Award Procedure: All rehabilitation and innovation grant proposals will first be reviewed by the regional office to assure that they meet all minimum legal standards. When this review has been completed, and if a proposal meets the minimum legal standards, it will be certified as eligible for funding. Proposals not meeting minimum legal standards will be returned to the applicant. Periodically (three times a year once the program is fully operational), all certified proposals will be evaluated and ranked in the regional offices. The highest priority proposals within established funding limits will be submitted to the National Park Service, Washington, DC Office where they will be judged by panels whose members are knowledgeable in recreation and urban revitalization. Innovation and rehabilitation proposals will be ranked separately. Following review and ranking by the panels, the Director will approve tentative grant offers for those proposals which may be funded. Successful applicants will be notified by the National Park Service Regional Offices, and completion of the formal application process will take place. The formal application process must be completed within 120 days of notification of the tentative grant offer, or the tentative grant offer may be withdrawn. Final approval of the grant and obligation of funds will occur when all application requirements have been met and the appropriate documents are on file. Recovery Action Program (planning) grants, unlike Rehabilitation and Innovation grants, require a single application and competition at the regional level.

Deadlines: None.

Range of Approval/Disapproval Time: Within 30 days.

Appeals: None.

Renewals: Not applicable.

ASSISTANCE CONSIDERATIONS:

Formula and Matching Requirements: (a) Recovery Action Program grant matching. Up to 50 percent matching grants are authorized for the preparation of Recovery Action Programs. Local in-kind donations of assistance (salaries, supplies, printing, etc.) for the preparation of a Recovery Action Program may be used as part of the 50 percent local match. State in-kind donations for the preparation of a Recovery Action Program may also be used as part of a local match (part of the 50 percent). Any costs for which a Federal match is sought must be well documented to provide adequate accountability for audit purposes. (b) Rehabilitation and Innovation grant matching. The program provides for 70 percent Federal match for rehabilitating existing recreation facilities and areas. Seventy percent matching funds are also authorized to local governments for innovation grants which will address widespread coordination, management and access problems through innovative and cost effective approaches; as an incentive for State involvement in the recovery of urban recreation systems, the Federal government will match, dollar for dollar, State contributions to the local share of an Innovation or Rehabilitation; up to 15 percent of the approved grant. The Federal share will not exceed 85 percent of the approved grant.

Length and Time Phasing of Assistance: Construction activities in either Rehabilitation or Innovation proposals will be limited to three years or three full construction seasons, whichever is greater. Innovation proposals which consist of service or program stages (e.g., hiring or training personnel, and action/element before actually providing the recreation service) must be initiated within one year from grant approval.

POST ASSISTANCE REQUIREMENTS:

Reports: Inspection reports will be requested on completed projects assisted through UPARR. Reports are required with billings.

Audits: In accordance with the provisions of Attachment P to Circular A-102, "Uniform requirements for grants to State and local governments," audits shall be made of organizations carrying out this program at least once every two years. These audits will be made in accordance with the General Accounting Office guidelines, "Standards for Audit of Government Organizations, Programs, Activities and Functions," and additional OMB guidance.

Records: Maintain records to facilitate audit, including records that fully disclose the amount and disposition of assistance; the total cost of the project; and the amount and nature of that portion of the cost supplied by other sources.

FINANCIAL INFORMATION:

Account Identification: 14-0720-0-1-303.

Obligations: (Grants) FY 81 $60,000,000; FY 82 est $8,000,000; and FY 83 est $1,400,000.

Range and Average of Financial Assistance: Rehabilitation Grants, $8,438 to $5,250,000; Innovation Grants, $7,000 to $1,100,000; Recovery Action Program Grants, $2,750 to $175,000. In 1982, no funds are available for Rehabilitation grants. $7,680,000 are available for Innovation grants to former Innovation grant recipients (see "Eligibility").

PROGRAM ACCOMPLISHMENTS: Through the planning requirement and grant assistance the program is beginning to help communities restore their park and recreation systems. The planning process which has been developed will help communities plan effectively for their park and recreation needs. Rehabilitation and Innovation Grants: In 1979 and 1980 - 170 for 58.7 million. Recovery Action Program (planning) Grants: In 1979 and 1980 - 205 grants for $4.3 million. Rehabilitation and Innovation Grants: In FY 81,153 grants for $58.4 million. RAP Grants: FY 81-70 grants for $2.0 million.

INFORMATION CONTACTS:

Regional or Local Office: See Appendix IV of the Catalog.

Headquarters Office: National Park Service, Division of State, Local and Urban Programs, Washington, DC 20240. Telephone: (202) 272-3516. Contact: Sam Hall, Chief.

EXAMPLES OF FUNDED PROJECTS: Rehabilitation grants have been awarded to renovate a wide variety of existing community park and recreation facilities. Innovation grants have been awarded to demonstrate unique and cost-effective methods for providing better recreation services. Successful proposals have utilized volunteer citizen corps for maintaining neighborhood parks, promoted anti-crime and safety programs in parks, and have used new techniques to coordinate public-private sharing of recreation resources and facilities. Other proposals have been successful in providing recreation for the handicapped and senior citizens, through outreach programs and community extension services.

CRITERIA FOR SELECTING PROPOSALS: The program is competitive and the demand for grants far exceeds the available funds. Preapplications are rated and ranked in accordance with a national ranking system to ensure that grants are fairly and equitably awarded. Full applications are invited based on the ranking of the preapplications. Ranking factors include population, condition of existing recreation areas and facilities, demonstrated deficiencies at the neighborhood level particularly for minority and low moderate income residents, public participation extent of project support by local government, the extent to which the project will provide employment opportunity, and the amount of State and private support.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: The Justice Department may go to court to obtain an order to desegregate a public school or public college. The Attorney General must certify that the suit will materially further the orderly process of desegregation. In addition, the Attorney General may litigate Title VI referals received from the Department of Education, previously the Department of Health Education and Welfare, to vindicate the rights of individuals excluded from participation in, denied the benefits of, or subjected to discrimination under any program or activity receiving Federal financial assistance on account of their race, color or national origin. The Attorney General may also go to court to obtain an order to desegregate public schools pursuant to the Equal Educational Opportunities Act. Such a suit is to be brought on behalf of an individual who has been deliberately segregated on the basis of race, sex or national origin by a local or State educational agency.

PROGRAM ACCOMPLISHMENTS: During fiscal year 1981 we reached agreement with the State of Louisiana in our seven year old suit seeking to desegregate the State System of higher education, and submitted a proposed consent decree to the court. Discovery and negotiations continue in similar suit seeking desegregation of the State higher education system in Mississippi. A large portion of our efforts in the area of desegregation of elementary and secondary school systems focused on northern school systems. Final desegregation orders were entered in cases involving public schools in the metropolitan area of Indianapolis, Indiana, South Bend, Indiana, St. Louis, Missouri, and Ferndale, Michigan. Efforts were continued to obtain desegregation in Chicago, Illinois and Kansas City, Kansas, and enforcement and monitoring of desegregation in Cleveland, Ohio was on-going. In addition, new suits were initiated seeking to desegregate schools in Yonkers, New York and Lima, Ohio. The Yonker's complaint alleged discrimination in the location of public and subsidized housing as well as in the operation of the school system. This is the first time that the Government combined fair housing and school violations in a single proceeding. We also successfully argued that a State statute in the State of Washington that prohibited the use of transporation to desegregate the schools was unconstitutional. There was considerable progress in our continuing efforts to complete the desegregation process in Southern States. Plans of desegregation were ordered in East Baton Rouge Parish (Baton Rouge), Louisiana, Caddo Parish (Shreveport) Louisiana, Monroe, Louisiana, Tuscaloosa, Alabama, Birmingham, Alabama, Lubbock, Texas, and South Park (Beaumont), Texas. New school desegregation suits were filed seeking desegregation in Charleston, South Carolina, Marshall, Texas and Big Spring, Texas. In the Marshall case a final order requiring implementation of a new plan was entered. Enforcement efforts to assure proper implementation of present plans or development of new plans continued in Rapides Parish (Alexandria), Louisiana, Port Arthur, Texas and several districts in southern Alabama, including Mobile. Efforts to remedy sex-based discrimination in schools continued in four cases. We unsuccessfully argued as amicus curiae that alleged sex discrimination in the operation of the Ann Arbor, Michigan high school athletic program was covered by Title IX of the Education Amendments of 1972. A similar suit in which we are participating continues with respect to the University of Alaska athletic program. We also continued to prepare our cases against a State-operated maritime school which until recently excluded women, and Texas A and M University for its allegedly, discriminatory operation with respect to the Corps of Cadets. In another major case, we obtained a comprehensive order requiring the State of Texas to assure implementation of bilingual education programs designed to meet the educational needs of limited English proficient Mexican-American students. Decisions by the Court of Appeals affirmed lower court decisions finding a Texas statute, which effectively excluded illegal alien children from public schools, unconstitutional. Finally, a court permanently enjoined Mississippi State University from charging Iranian students tuition, finding this policy was unconstitutional.

USES AND USE RESTRICTIONS: Title VII of the 1964 Civil Rights Act, as amended in 1972, and other Federal laws forbid discrimination by employers, labor organizations, employment agencies, State and local government and public agencies. Other similar statutes pertain to recipients of Federal funds. The Attorney General is authorized to sue to enjoin discrimination in employment by State and local government agencies. He also is authorized to sue to enforce the non-discrimination in employment provisions of Executive Order 11246, as amended, with respect to government contractors and sub-contractors. In addition, the Civil Rights Division represents other Federal agencies which enforce these laws when they are named as defendants. The Attorney General does not, as such, represent specific individuals though the public interest is served by obtaining relief for them through pattern and practice or 706 referral lawsuits.

PROGRAM ACCOMPLISHMENTS: The Federal Enforcement Section of the Civil Rights Division filed 10 new affirmative lawsuits to enforce equal employment opportunity provisions of Federal law, participated in 14 defensive-intervenor cases and obtained 18 consent decrees in employment cases in fiscal year 1981. For example, relief for blacks, Hispanics, and women was obtained by consent with the Los Angeles Police Department, one of the largest departments in the country with 7300 employees. In addition to hiring goals of between 20-25 percent for each group, the city agreed to allot up to $2 million for backpay and other relief for those groups who had been adversely affected by the written examination, physical agility test and minimum height standard. In North Carolina a consent decree was obtained from the State Police providing hiring goals of 50 percent and 25 percent for blacks and females respectively. In that case the height requirement, the remaining issue to be litigated, was held by the court to discriminate against women seeking to become State troopers. A second trial was held in Fairfax County, Virginia, after both sides had taken an appeal from the district court's order in the first trial in 1979, invovling employment practices on a county-wide basis. The Government prevailed on its evidence at the second trial with the court finding pervasive discriminatory practices against blacks and women in most major job classifications. Pursuant to the court's order, potential discriminatees from among 10,000 black and female applicants to the County since 1977 are being notified of their rights. The Department of Transportation (DOT) was defended in 8 suits filed against it by several State contractor associations and others seeking to enjoin the application of minority business regulations in the contract awarding of DOT's funds. Administratively, the Department of Justice issued over 4,000 "Right to Sue Notices" in response to referrals from the Equal Employment Opportunity Commission as well as in response to requests from individual charging parties.

16.103 FAIR HOUSING AND EQUAL CREDIT OPPORTUNITY

FEDERAL AGENCY: CIVIL RIGHTS DIVISION, DEPARTMENT OF JUSTICE

AUTHORIZATION: Civil Rights Act of 1968, Title VIII; Public Law 90-284; 42 U.S.C. 3601. Equal Credit Opportunity Acts of 1974 and 1976; Public Laws 93-495 and 94-239 respectively; 15 U.S.C. 1691.

OBJECTIVES: To provide freedom from discrimination on the basis of race, color, religion, sex or national origin in connection with the sale, rental, and financing of housing and other related activities. (Fair Housing Act). The Equal Credit Opportunity Act (E.C.O.A) prohibits discrimination in credit transactions on the basis of race, color, religion, national origin, sex, marital status, or age (provided the applicant has the capacity to contract,) because all or a part of the applicant's income is derived from a public assistance program, or because the applicant has in good faith exercised any right under the Consumer Credit Protection Act.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: Title VIII of the Civil Rights Act of 1968 is designed to assure freedom from discrimination in the sale, rental and financing of housing, and other related activities. A private suit alleging discrimination may be filed in the appropriate Federal or State court. The Attorney General is authorized to bring civil actions in Federal courts when he has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of discrimination or when he has reasonable cause to believe any group has been denied such rights in a case of general public importance. The E.C.O.A., as amended, is designed to prohibit discrimination in all aspects of credit transactions on a prohibited basis. Persons who believe that they are victims of such discrimination may file complaints with one of the appropriate Federal regulatory agencies or may bring the information to the attention of the Attorney General. The Department of Justice is authorized to institute litigation in Federal Courts when a matter is referred to the Attorney General by an agency responsible for administrative enforcement of the Act or when he has reasonable cause to believe that one or more creditors are engaged in a pattern or practice in violation of the Act. In addition, an aggrieved person may institute suit in a Federal court. In such cases punitive damages, in an amount not to exceed $10,000 in addition to actual damages, or in the case of a class action a maximum of the lesser of $500,000 or one per centum of the net worth of the creditor, may be granted by the court.

PROGRAM ACCOMPLISHMENTS: During fiscal year 1981, the Division filed five new fair housing cases and obtained consent decrees in six cases. We also filed briefs as amicus curiae in two other cases. Most of these actions involved racial discrimination, although national origin and sex discrimination were also involved. Defendants were primarily apartment rental and management companies, housing developers, real estate agencies, public housing authorities and municipal governments. One of the new suits involved racially exclusionary municipal land use practices by a municipal government in Connecticut. The suit alleged that the town had prevented the development of racially integrated low and moderate income housing within its boundries in response to racially motivated citizen opposition. During the year trial in two similar suits involving municipalities in Michigan and Connecticut were conducted. We also obtained a final order in our suit against the city of Parma, Ohio, another racially exclusionary land case, which required extensive relief including an order that the city take steps to construct low-cost housing within the city and promote the city as one of open occupancy. During the fiscal year, the Division's enforcement of the Equal Credit Opportunities Act concentrated primarily on litigating existing cases. In one of our cases which alleged discrimination on the basis of age and marital status, involving the nation's largest consumer finance company, we entered a consent decree. Prior to the consent decree, the district court ruled that the statute does not authorize the Attorney General to obtain damages in pattern and practice suits, and we have filed an appeal seeking review of this aspect of the case. We also brought two new credit cases, including one alleging that a large Arizona bank discriminates against Indians in making mortgage loans and extending other types of credit. This was the first case filed by the Division involving the pratice of redlining, and the first credit case involving Indians. We also filed an amicus brief in a private redlining case.

16.104 PROTECTION OF VOTING RIGHTS

FEDERAL AGENCY: CIVIL RIGHTS DIVISION, DEPARTMENT OF JUSTICE

AUTHORIZATION: Voting Rights Act of 1965; Public Law 89-110; 42 U.S.C. 1973, as amended by Voting Rights Act Amendments of 1970 and 1975; Public Law 91-285 and Public Law 94-73; 42 U.S.C. 1971; 42 U.S.C. 1974; Overseas Citizens Voting Rights Act of 1975, Public Law 94-203, 42 U.S.C. 1973dd.

OBJECTIVES: To provide protection of an individual's right to register and vote in all local, State and Federal elections without discrimination on account of race, color, a membership in a language minority group, or age, and to assure the vote in Federal elections to United States citizens residing overseas.

TYPES OF ASSISTANCE: Provision of Specialized Services.

USES AND USE RESTRICTIONS: Under the Voting Rights Act of 1965, as amended in 1970 and 1975, no voting standard, qualification, prerequisite or procedure may be imposed or applied by any State or political subdivision to deny or abridge the right of any U.S. citizen to vote on account of race or color or because an individual is a member of a language minority group. Certain specially covered States and political subdivisions are required to submit any proposed voting changes either to the District Court for the District of Columbia for a declaratory judgment that the changes do not have the prohibited purpose or effect, or, in the alternative, to the U.S. Attorney General who has 60 days in which to object to the proposed change. No proposal to which the Attorney General has objected may be put into effect pending withdrawal of the objection or a subsequent declaratory judgment by the District Court for the District of Columbia. The Attorney General may send Federal voting examiners and observers to certain designated counties when he considers their presence necessary to enforce the Fourteenth and Fifteenth Amendments. The 1970 Amendments (1) suspend the use of literacy and other tests in all States and counties not previously covered by the 1965 Act; (2) set forth uniform standards regarding durational residency requirements and absentee registration and balloting in Presidential elections; and (3) lower to 18 the minimum age for voting in Federal elections. The 1975 Amendments permanently ban the use of literacy and other such tests, and require the conduct of bilingual elections in certain jurisdictions having more than 5 percent citizenry of a single non-English language group. It is noted that 42 U.S.C. 1971 prohibits withholding the right to vote on account of racially based distinctions, bans the application of registration or voting requirements different from those applied to persons already registered or permitted to vote, and prohibits the denial of the vote to any individual, under the Fifteenth Amendment, because of an error or omission which is not material in determining whether the person is qualified to vote. Also, 42 U.S.C. 1974 allows the Attorney General or his designee access to records for Federal elections for specified periods of time. Under the Overseas Citizens Voting Rights Act, 42 U.S.C. 1973dd, the Attorney General may institute judicial proceedings to enforce the Act's guarantee to U.S. citizens living outside of the U.S. of the right to vote in Federal elections.

PROGRAM ACCOMPLISHMENTS: The Division participated in 17 new voting rights cases during fiscal year 1980. The litigation included two cases filed against the Government where the Division gave support and advice to the U.S. Attorney in actions that sought to restrict the operation of the language minority provisions of the Voting Rights Act (Section 203), 14 cases involving enforcement of the preclearance requirements of Section 5, and one case attacking the apportionment of the South Carolina Senate. Noteworthy among the Division's cases concluded this year are the following: the obtaining of a consent decree that ended four years of litigation in a vote dilution case. Under the provisions of the decree, blacks will now have a fair opportunity to elect school board members of their choice under a single-member district plan that replaces a multi-member district method of election in East Baton Rouge Parish, Louisiana; in a case involving the rights of Indians in Apache County, Arizona, a three-judge court ruled that procedures used in successive elections should be compared in order to determine whether a change has occured under Section 5, notwithstanding the fact that the elections were held for different purposes; additionally, the court found that practices which violate the language minority provisions of the Voting Rights Act cannot pass review under Section 5; in a case involving St. Landry Parish, Louisiana, the court found that a vote-buying scheme alleged to have diluted the voting rights of blacks could state a cause of action under the Voting Rights Act; on remand, the election in question was voided pursuant to consent decree, and the white perpetrators of the vote-buying scheme (including the white candidate) pled guilty of offenses under 18 U.S.C. 242; and in an action against San Francisco, California, where the Division worked closely with the U.S. Attorney's office, a three-judge court entered a sweeping and comprehensive consent decree that details outreach activities requirements which include the requirements to provide bilingual poll officials, to establish an advisory citizen task force, and to maintain records and furnish reports of activities, all designed to achieve the city's compliance with the language minority provisions of the Voting Rights Act (Section 203) with respect to Chinese and Spanish speaking citizens of San Francisco. From October 1, 1980, through July 31, 1981, the Division initially participated as a party in five suits, and as amicus curiae in three suits. Of these eight suits, four involved issues under Section 5, three attacked methods of election that dilute the voting strength of minorities, and one preserved rights under the overseas Citizens Voting Rights Act. In addition to these suits, the Division advised and counseled the U. S. Attorney's Office in the Eastern District of California regarding one suit brought by the United States under the Overseas Citizens Voting Rights Act. In fiscal year 1980, 2,422 submissions involving a total of 7,312 voting-related changes were submitted to the Attorney General under Section 5. This is the largest number of changes ever to have been submitted for Section 5 review in any single fiscal year; objections were entered to 32 submissions during the year, including an objection to a redistricting plan that would have insured that a majority of the Selma, Alabama, city council would be comprised of white members; an objection to South Dakota legislation that would have foreclosed persons in two counties, both of which are predominantly Indian, from voting for the officials who provide governmental services; an objection to a referendum that proposed the adoption of a method of electing the Port Arthur, Texas city council in a way that would further the discriminatory impact of a consolidation by Port Arthur with nearby white citites (a previous objection had been entered to the consolidation because it diluted the voting strength of blacks); and an objection to a Corpus Christi, Texas school district apportionment plan that prevented Mexican-Americans from having a fair opportunity to elect persons of their choice. In addition, proposed revisions to the procedural guidelines for the administration of Section 5 were published in the Code of Federal Regulations in order to reflect changes in the law since 1971, when the guidelines were issued, and to give jurisdictions more helpful instruction about the submission process. From October 1, 1980, through July 31, 1981, the Division received 1,556 submissions, involving 4,847 voting changes under Section 5. Fourteen objections were interposed, including objections to plans for redistricting the Senate and the house of Delegates in the Commonwealth of Virginia. On January 5, 1981, the final revised guidelines for Section 5 were published in final form in the Federal Register. Under provisons of the 1965 Act which authorize the Attorney General to assign observers to monitor elections to ensure that the right to vote and to have the vote properly counted is not denied during the election process, 1,269 observers were assigned to cover 13 elections in 5 States, including elections in 10 counties that were initially certified by the Attorney General during fiscal year 1980. This is the third largest number of Federal observers to have been assigned, and the third largest number of counties to have been certified in any fiscal year since the Voting Rights Act was enacted in 1966. Included among the 10 counties certified in fiscal year 1980 were 8 counties in Georgia, double the number of Georgia counties certified in any other single fiscal year. During fiscal year 1981, through July 31, 1981, 385 observers were assigned to cover four elections in three States.
